

Puru Vijayvargia

Jaipur, India

I work on the web with bleeding edge technologies and frameworks, and bring companies the value they deserve.
Proficient in all things JavaScript-based fullstack web development.
Excels at performance improvements and refactors.

SKILLS

Frontend: Svelte, Sveltekit, React, NextJS, Remix(React Router 7), SolidJS, Vue, Nuxt

Backend: NodeJS/Bun/Deno, Golang, Python, PHP

Docker: Intermediate knowledge

Databases: SQL(SQLite, Postgres, MySQL), NoSQL(MongoDB, Firebase)

EXPERIENCE

Beyonk, Remote – Software Engineer

April 2025 – December 2025

- Shipped multiple enhancements to consumer-facing side of the product
- Implemented multiple features, enhancements, performance optimisations to provider-facing side of the product
- Refined the codebase, removed multiple legacy components, simplified architecture

Contract work, Remote

December 2024 – April 2025

- Contract work with prestigious European corporations & institutions.
- AI Startup: Facilitate shipping features and products at a very short notice.
- Svelte Packages - Worked on initial prototype of svelte.dev/packages page which included LLM-based filtering, tagging, descriptions with offline-first search

Clockwork Labs, Remote – Senior Frontend Engineer

Feb 2024 – December 2024

- Brought measurably higher traffic to spacetimedb.com by making it 15x faster and 20x smaller(5000KB JS bundle to 100KB).
- Shipped Bitcraft web apps.
- Refined the TypeScript SDK to be streamlined and performant(from 114KB min+br to just 7KB).

Svelte team, Remote

Feb 2023 – Present

- Recreated the official website svelte.dev with dark mode.
- Refactored code between all svelte organisation websites to be more shared and maintainable.

- Recreated entire REPL to be more type-safe, less buggy, and optimized it aggressively

Stackblitz, Remote – *Senior Frontend Engineer*

Jan 2022 - Mar 2023

- Exposed Bootstrap framework's users to Stackblitz's capabilities.
- Web Publisher: One-click Documentation editing with live preview.
- Viteconf.org: Created and collaborated on website to boost Vite's presence and impact in the entire JavaScript ecosystem and community.
- Webcontainer docs: Wrote the official tutorial, collaborated on guides, created Proof of Concepts for REPLs for Fortune 500 companies.

Rigo, Remote – *Senior Frontend Engineer*

Aug 2021 - December 2021

- Made Apple-style Interactive homepage to showcase products.
- Damage control in critical moments.
- Optimized the development to production pipeline.

PERSONAL PROJECTS

macOS Web

Nov 2020 - Jan 2023

- Created the fastest and the most polished version of macOS Big Sur/Monterey/ventura on web.

neodrag.dev

Jul 2021 - Present

- One draggable to rule them all: Neodrag is a set of multiple libraries for all of the major frontend frameworks. No more than 2.0KB for any framework. 4k weekly npm downloads

neoconfetti

Jul 2021 - Present

- One draggable to rule them all: Neodrag is a set of multiple libraries for all of the major frontend frameworks. No more than 2.0KB for any framework. 4k weekly npm downloads

neotraverse

Aug 2024 - Present

- Zero-dependency alternative to js-traverse. 1Million+ weekly downloads on NPM

SPEAKING

React India 2024 – *Goa, India*

Harnessing the titans of Performance and Animations

- Flipping the multi-framework approach, we'll integrate Svelte's animations and Vue's reactivity into React, turning it into a metaframework playground for peak performance and flexibility.

Svelte Summit 2022 – *Stockholm, Sweden*

How to migrate React libraries to Svelte

- React ecosystem has tons of nice libraries that Svelte ecosystem does not. So, let's recreate an awesome Confetti library into Svelte. And let's make it fast and small(9x smaller)

EDUCATION

IIITDM Kancheepuram, India – *B.Tech Computer Science*

Jul 2020 – Jul 2024

Achieved BTech degree in Computer science from engineering institute of national importance.

LANGUAGES

English - Full Professional Proficiency

Hindi - Full Professional Proficiency
